## Welcome to Illumio Managed Services Portal 23.41

This chapter contains the following topics:

About This Release .....	4
--------------------------	---

Illumio is pleased to announce the general availability of version 23.41 of Illumio® Managed Services Portal. This new release contains changes as described in this document.

### About This Release

This documentation portal describes the new features, enhancements, platform support for the Illumio Managed Services Portal 23.41 release.

### Product Versions

Illumio Managed Services Portal Version: 23.41

### Release Types and Numbering

Illumio Managed Services Portal release numbering uses the following format: “a.b.c-d+e”

- “a.b”: Standard or LTS release number, for example “23.41”
- “.c”: Maintenance release number, for example “.1”
- “-d”: Optional descriptor for pre-release versions, for example “preview2”

## Chapter 2

---

### What's New and Changed in This Release

This chapter contains the following topics:

What's New and Changed in 23.41 .....	5
What's New in Previous Releases .....	5

Before using the Illumio Managed Services Portal 23.41 for the first time, familiarize yourself with the following new and modified features in this release.

The information in this section describes the changes to the Managed Services Portal.

#### What's New and Changed in 23.41

This section describes the new features and functionality provided by IllumioManaged Services Portal release 23.41.

##### Illumio MSP 23.41 Maintenance Release

###### UI refresh

This release introduces various updates to the user interface and user experience.

###### Transparent performance improvements

Illumio provides regular maintenance updates to improve reliability and performance. In this release, these types of updates are transparent to users.

#### What's New in Previous Releases

Previous releases of the Managed Services Portal introduced the following new features and enhancements.

## What's New and Changed in 23.21.1

### Illumio MSP 23.21 Maintenance Release

This provided regular maintenance updates to improve reliability and performance. For a list of resolved issues in this release, see “Resolved Issue in Managed Services Portal 23.21” in the Illumio Managed Services Portal Release Notes 23.21.

## What's New and Changed in 22.51.0

### Support for Illumio Core (MSP Enterprise customers only)

Beginning with this release, the Illumio Managed Services Portal supports managing and administering Illumio Core tenants on behalf of MSP and MSSP Enterprise customers. This in addition to the existing support for managing and administering Illumio Xpress, and Illumio Edge tenants.

### New Global Administrator Role

**NOTE:**

In the Managed Services Portal, the role of Global Administrator differs from the role of the same name in the PCE.

Users assigned the Global Administrator Role have the following permissions and limitations.

MSP Global Administrators can:

- View and manage tenants, including create policy for tenants, just like a Global Organization Owner
- View the Events page on the MSP portal

MSP Global Administrators cannot:

- Create, update, or delete a tenant
- Create, update, or delete Managed Services Portal users (the Access Management option does not appear for Global Administrators.)
- Manage the Managed Services Portal subscription

For details, see [Manage RBAC for Your Illumio Managed Services Portal](#).

## What's New and Changed in 22.31.0

This section describes the new features and functionality provided by Illumio Managed Services Portal release 22.31.0.

### Stand alone Illumio Managed Services Portal

Beginning with this release, the Illumio Managed Services Portal is now a stand alone product, not just a feature of Illumio Edge.

### IdP Integration

Illumio Managed Services Portal now integrates with third-party Identity Provider (IdP) solutions for SAML Single-Sign On Authentication (SSO) access to your Illumio Managed Services Portal organization.

### Add Users and Groups to Your Managed Services Portal organization

Illumio Managed Services Portal organization owners can add other MSP/MSSP users to their organization and grant them roles with specific permissions.

### Manage your Managed Services Portal profile

Your Managed Services Portal profile is created automatically when Illumio creates your Managed Services Portal organization. Beginning in this release you can manage your profile.

### View and Export Events

The Illumio Managed Services Portal web console now provides an ongoing log of all Organization events that occur in your Managed Services Portal organization. For example, Organization events capture actions such as users logging in and logging out, tenant creation, failed login attempts, and so on.

### Usage-based Billing Integration

The Illumio Managed Services Portal integrates with a third-party payment management provider to handle usage-based billing for your Managed Services Portal organization. Illumio creates a subscription to that provider for your Managed Services Portal organization.
