- “.c”: Maintenance release number, for example “.1”
- “-d”: Optional descriptor for pre-release versions, for example “preview2”

What's New In This Release

MSP 23.41 is a maintenance release. Here's what's new:

- **UI refresh**

This release introduces various updates to the user interface and user experience.

- **Transparent performance improvements**

Illumio provides regular maintenance updates to improve reliability and performance. In this release, these types of updates are transparent to users.

Resolved Issue in Managed Services Portal 23.21.1

- **Fixed styling for Add Role menu (E-100847)**

The **Add Role** dropdown menu had a styling issue that confused some users. This issue is resolved.

Known Issue in Managed Services Portal 23.21.1

- **Redirection to Welcome screen when attempting to access App Group menu options (E-105898)**

In Illumio Core, clicking **App Groups > App Group Map** or **App Groups > App Group List** redirects to the Welcome screen instead of to the desired App Group page. Currently there is no workaround.
